Applicant's election of claims 1-4 in the reply filed on 8/5/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 13, 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Balachandran et al, Mat. Res. Soc. '02.

Balachandran teaches an inclined substrate deposition comprising a biaxially textured buffer layer of MgO and further layers of YSZ and CeO<sub>2</sub> beneath a YBCO film. The beta angle tilt was 22 or 32 degrees. See page 313. Accordingly, claims 1-4 are anticipated structure.

Balachandran '613, Selvamanickam '672, Shoup '344, and Schmidt '578 are relevant art.
